

The software is developed using C++ and Matlab

To use it, you need write some Matlab scripts, which are very simple. I have prepared some examples,

First, you need double click "MatlabQtVTK_GUI.exe" to start the C++ program, and get this:

Then, in Matlab, open the file "test_plot_mesh" , and click run or press F5, and you get his :

(you need to add the folder "matlab" to matlab path)
